English

PROFILE

Final-year Computer Science student at the Federal University of Technology Owerri (FUTO), focused on backend development with Java and Spring Boot. Experienced in building REST APIs backed by PostgreSQL, from data modeling through to tested, working endpoints. Comfortable working independently through complex technical problems and documenting the process publicly. Seeking an internship role to apply and grow these skills in a real engineering environment.

PROJECTS

Store Management API (storeapi) IN DEVELOPMENT

- Building a Spring Boot REST API for managing store inventory, products, and transactions, backed by PostgreSQL.
- Designing entity relationships across products, stock, and orders, following clean layering between controller, service, and repository.

Student Management API (studentapi) COMPLETED

- Built a full CRUD REST API for managing student records using Java, Spring Boot, and PostgreSQL.
- Implemented and tested all endpoints end-to-end using Bruno, verifying create, read, update, and delete operations.

Personal Portfolio Website LIVE

- Designed and built a personal portfolio site with HTML, CSS, and JavaScript to showcase projects and background.
- Deployed via GitHub and Vercel with a custom dark-themed design.
